

Water's Journey through the Everglades

Big Ideas and Deliverables

- Using technology to seed "What if?!" learning experiences
- Play as an extension of life

Audience and Impacts

- Adolescents as gateway to the family: greater awareness of water's importance, a clearer understanding of environmental change and increased confidence in understanding relevance

Challenges and Successes in Project

- Pace of technology change
- Response to learning simulations

Next Steps

- Exploration of sustainability science connections and extensions
- Simulation's ability to extend exhibit learning for all areas of museums
