CAISE and the National Science Foundation ISE Program
ISE Organizational Networks Convening
November 17 and 18
Melrose Hotel
Room Potomac III
Washington, DC

Meeting Overview

The ISE Organizational Networks Convening is a small workshop of ISE-funded principal investigators and their project evaluators to inform and improve how we do our work. Attendees include principal investigators, other project staff and evaluators from around the

country reflecting a range of informal science education sectors, including science centers and museums, broadcast media, science journalism, cyberlearning and out of school time projects and programs. The structure and content of the convening will be designed to focus on the intersection of theory and practice, and draw heavily from your own experience and reflections on your work in this realm.

Our goal is for outcomes and outputs from the workshop to flow into and inform a strand of the March 2012 ISE PI Meeting. As an ISE PI, you will be invited to that meeting as well. The intent of this convening is to deepen the ISE field's understanding about the benefits, challenges and unexplored opportunities that working in networks provides. NSF also expects to learn from the process as it continues to consider the ISE program's strategic direction.

The topic of this convening, " ISE Organizational Networks", comprises an important portion of the ISE program portfolio, and participants

ISE-funded project have been identified as representative of the type of network structures that we would like to explore and generate new thinking and knowledge about during this convening.
